

Sécheron

Are you looking for a new challenge?

For our tractions substation activity we are seeking a

CALCULATION AND MEASUREMENT ENGINEER

Your mission:

- Simulation of functioning and design of electric traction network
- Specification of main components (transformer, rectifier, circuit breaker, etc.)
- Expertise and technical support for our customers and our engineering department
- Study and preparation of RAMS and safety files
- Participation to the homologation of our products (type tests)

Your profile:

- Engineering degree in electrical engineering, high voltage specialization
- Experience in railway or/and strong interest for this field
- Knowledge of calculation software (Matlab) and "C" programming
- Fluent in English, French an asset
- Dynamism, sociability and entrepreneurial spirit

We offer an agreeable working environment in an international company with quality social conditions.
